SUMMARY

Cybersecurity focused, CEH certified Computer Science undergraduate specializing in vulnerability assessment, endpoint security and secure system design.

EXPERIENCE

Cybersecurity Intern, AdlerQA Technologies Pvt Ltd

June 2026 – Present

view offer letter

Indore, Madhya Pradesh

- Conducted manual VAPT on WardenIQ, identifying 6 confirmed vulnerabilities across 20+ API endpoints — including 2 High, 2 Medium, 2 Low severity findings.
- Tested authentication, session management, secrets handling, file upload validation, and API authorization using Burp Suite, browser DevTools, and manual source code review.
- Currently conducting IDOR and authorization testing on ArchitonX, a construction management platform.

PROJECTS

VigiLance | *Python, Tkinter, OpenCV, Cryptography, Telegram API, Windows*

[GitHub repository](#)

- Built a Windows endpoint IDS monitoring WhatsApp Desktop in real time, validated against 15–20 simulated intrusion attempts; packaged as a 61.7 MB standalone .exe (PyInstaller) with a password-protected GUI dashboard for incident review, log export and key management — zero-dependency on Windows 11.
- Automated forensic evidence capture via OpenCV webcam integration; activity logs encrypted with AES-128 (Fernet) and stored locally; real-time alerts delivered via Telegram Bot API with <10 second end-to-end latency.

Password Security Auditing Tool | *Python, Tkinter, Cryptography, Linux*

[GitHub repository](#)

- Simulated dictionary attacks using the full 14-million-entry RockYou wordlist (~130 MB), cracking weak passwords within seconds for realistic threat modeling.
- Implemented SHA-256 password hashing with strength evaluation, automated security reporting, performance monitoring and user-controlled data export for compliance documentation.

Port Scanner | *Python, Tkinter, Nmap, Linux*

[GitHub repository](#)

- Built a GUI-based network reconnaissance tool with 3 scan modes: Quick Scan (top 1,000 ports in 2–10 seconds), Full Scan (all 65,535 ports) and Service Version Detection (top 1,000 ports + service fingerprinting).
- Automated .txt report generation with date-time stamping and file export for audit documentation.

CERTIFICATIONS

Certified Ethical Hacker (CEH) - ECC1942805376 (*EC Council*)

[certificate](#)

Google Cybersecurity Specialization (*Google*)

[certificate](#)

Computer Networking Basics (*IBM SkillsBuild*)

[certificate](#)

Ordered Data Structures (*University of Illinois Urbana-Champaign*)

[certificate](#)

Leading People and Teams (*University of Michigan*)

[certificate](#)

EDUCATION

Manipal Institute of Technology

Bengaluru, Karnataka

B. Tech. in Computer Science(Cyber Security)

2023 – 2027

Dr. Virendra Swarup Education Centre

Kanpur, Uttar Pradesh

ICSE, PCM with Computer Science

2010 – 2022

SKILLS

Technical Skills: Python, Java, C, SQL, HTML/CSS, Linux, Windows

Cybersecurity: Ethical Hacking, Vulnerability Assessment & Penetration Testing (VAPT), Web Application Security, API Security Testing, Authentication & Authorization Testing, IDOR Testing, Session Management, Endpoint Security, Network Reconnaissance, Cryptography (AES-128, SHA-256), Secure Software Development

Tools: Burp Suite, Nmap, Wireshark, Docker, Git, FastAPI, OpenCV, Tkinter, PyInstaller, VS Code

Leadership & Activities:

President, OtakuSpot • **Placement Committee**, MIT Bengaluru • **Vice Captain**, Aries (General Championship – 1st) • **Intern**, [InternLoom](#) • **Founding Team**, GDSC • **Marketing Team**, Falak • **Basketball Captain** (3rd Place)
